

Quality Policy

The main focus of Japan Advanced Roll Co., Ltd. is the design, development, manufacture, sales, and maintenance of forged rolls. Our mission is to evolve continuously as a company that contributes to society by creating products and delivering the quality and service desired by our customers.

1. It is imperative that we adhere to the requirements of our customers, laws, and regulations, while maintaining a steadfast commitment to the principles of compliance with the "Basics and Ethics" in all our business endeavors.
2. We consistently strive to enhance our technological expertise and skills to bolster reliability and effectively address emerging needs.
3. Our goal is to deliver products and services of the highest reliability, thereby fostering genuine customer satisfaction and making meaningful contributions to society.
4. We rigorously assess the adequacy and suitability of our quality management system through comprehensive management reviews and other assessment mechanisms, continuously enhancing its efficacy.
5. Each of our departments establishes measurable quality objectives and evaluates their attainment, perpetually refining their performance to drive continuous improvement.

We periodically review our quality policy and ensure its dissemination among all employees of Japan Advanced Roll Co., Ltd. and those engaged in activities associated with our company.
